

ADAPTING LOOX3 DRIVER TO LOOX5 DISTRIBUTOR

Loox3 24v drivers are supplied with a Loox socket/plug adapter that plugs directly into the Loox3 driver port. Once the adapter is in place, plug in the distributor or mesh box. An optional Loox5 extension lead may be used if desired.

Please note that the **24v 90W** Loox3 driver ports support up to 84W so in most cases a Y-splitter is not needed. 24v Y-splitters are available for customers who do require them, please contact Häfele Customer Service at 800.423.3531 to place your order.

DISTRIBUTOR CONNECTIONS WITH LOOX3 DRIVER AND ADAPTER

- 1. Plug power cord into driver
- 2. Plug the adapter into driver
- 3. Connect adapter to distributor or mesh box. An optional extension lead may be used if desired.
